

BARTY HOUSE

A CANFORD HEALTHCARE HOME

BARTY HOUSE, EXPANDING A TRULY IMPRESSIVE CARING ENVIRONMENT

Barty House in Kent has been an imposing building in the landscape around Bearsted village for over a century. Once the residence of the Bertie family, it is now a leading care home registered for 32 beds. Staff and carers at this Canford home subscribe to a forward-thinking philosophy of care that promotes independence, dignity and respect, giving those who live and work at Barty House a sense of pride in all it offers, from exceptional day-to-day care to post operative and palliative care.

Now Barty House will also have updated and forward-thinking care facilities to match its outlook, as it nears the completion of a refurbishment programme, with a modern extension to the main Georgian building. By the end of June the extension work will be finished, adding another 27 luxury rooms, all with en-suite WC and shower facilities, and many with views across the surrounding countryside and patio doors opening onto a courtyard. Further refurbishment of the main Georgian building will allow for the interiors to be tastefully and sympathetically updated and refreshed. It is hoped that this will be completed by September.

Barry Lambert, director, Canford Healthcare plc said, "This is a very exciting time for us

at Barty House. Following the completion of works on the property we will be able to welcome more residents to our home. We are uncompromisingly dedicated to quality care, that provides a homely and safe environment while safeguarding the dignity of individuals."

As a Canford Healthcare home, Barty House is committed to providing excellent standards of care, in the most comfortable and pleasant surroundings. Through careful planning, management and communication it is anticipated that there will be minimal disruption to residents and staff. The improvements will increase the provision of care to accommodate many more elderly members of the community.

Barty House specialist care services include:

- Long and short term stay (including respite)
- Palliative care
- Post-acute rehabilitation
- Individual assessment and care plans with monthly reviews
- 24 hour nursing
- Social, recreational and stimulating activities programme both on and off site

Barty House also has a dedicated activities co-ordinator and provides a wide range of daily therapeutic and leisure activities from games in the garden to karaoke afternoons. All residents who have a special interest or hobby are encouraged and, if practicable, facilitated to enable them to continue. From time to time special entertainment is provided from external source such as "The Summer Holiday Show", which takes residents on a magical journey through songs from around Europe from the

comfort of the lounge. We are also expanding our programme and facilities to include a new activities and cinema room, outings to local beauty spots, attractions and gardens, or for a cup of tea and cake. The library contains a varied selection of books including large print and talking books. The activities co-ordinator also spends time with residents on an individual basis reading newspapers to them and helping with their post.

Nestled in heart of the picturesque village of Bearsted, Barty House is a grand property with

far reaching views across open countryside and is only a few minutes walk from the famous cricket green with shops and the train station also close by.

The staff at Barty House would be delighted to see you at any time. **Jacqui Butler, General Manager of Barty House, can be contacted 01622 737025 with any questions you may have or for more information visit; www.bartyhouse.co.uk.**
